Advances in Production Management Systems: Perspectives and future challenges (IFIP Advances in Information and Communication Technology) Norio Okino, Hiroyuki Tamura, Susumu Fujii

This volume includes 41 revised papers selected from 125 papers presented at the 6th IFIP Technical Committee 5/Working Group 5.7 International Conference on Advances in Production Management Systems - APMS'96 - held at Kyoto, Japan, 4-6 November 1996. The task of selecting papers was accomplished by the IPC members voting. The selected papers were reviewed by IPC members who attended the conference. Based on the comments of reviewers, each paper was revised and rewritten in the format of this book. Therefore, the quality of each paper was raised very much. The papers selected in this volume were classified into invited articles and six themes taking into account the perspectives and future challenges in production management systems. Invited articles provide the overview of the present and future trend in the manufacturing world. Six themes were Next Generation Manufacturing Systems and Production Management, Benchmarking, Integration in Manufacturing and Decentralized Production Management, Strategic Aspects, Production Planning, and Production Scheduling. Each theme covers important area of present and future production management reflecting the recent trend in manufacturing toward globalization, agility in variety production, human centered manufacturing, environment consciousness, and so on. We hope that this volume will emerge a lot of new ideas to reach the goal of IFIP WG5.7 "Computer Aided Production Management" and to bridge the gap between research and industrial practice in production management systems.

From reader reviews:

Ward Bishop:

What do you about book? It is not important along with you? Or just adding material when you need something to explain what yours problem? How about your time? Or are you busy particular person? If you don't have spare time to perform others business, it is gives you the sense of being bored faster. And you have extra time? What did you do? Everybody has many questions above. They must answer that question because just their can do in which. It said that about book. Book is familiar on every person. Yes, it is proper. Because start from on guardería until university need this particular Advances in Production Management Systems: Perspectives and future challenges (IFIP Advances in Information and Communication Technology) to read.

Erik Herrera:

The book Advances in Production Management Systems: Perspectives and future challenges (IFIP Advances in Information and Communication Technology) has a lot associated with on it. So when you check out this book you can get a lot of profit. The book was published by the very famous author. Tom makes some research before write this book. This particular book very easy to read you can obtain the point easily after reading this article book.

Ricky Copeland:

It is possible to spend your free time to learn this book this book. This Advances in Production Management Systems: Perspectives and future challenges (IFIP Advances in Information and Communication Technology) is simple to create you can read it in the park, in the beach, train and soon. If you did not possess much space to bring the actual printed book, you can buy the particular e-book. It is make you simpler to read it. You can save often the book in your smart phone. And so there are a lot of benefits that you will get when you buy this book.

Bryan Rodriguez:

That book can make you to feel relax. That book Advances in Production Management Systems: Perspectives and future challenges (IFIP Advances in Information and Communication Technology) was bright colored and of course has pictures on the website. As we know that book Advances in Production Management Systems: Perspectives and future challenges (IFIP Advances in Information and Communication Technology) has many kinds or category. Start from kids until adolescents. For example Naruto or Investigation company Conan you can read and believe you are the character on there. Therefore not at all of book usually are make you bored, any it offers you feel happy, fun and rest. Try to choose the best book for you personally and try to like reading that.
