Build A Solar Hydrogen Fuel Cell System

Phillip Hurley

Build A Solar Hydrogen Fuel Cell System Phillip Hurley

Learn how to construct and operate the components of a solar hydrogen fuel cell system: the fuel cell stack, the electrolyzer to generate hydrogen fuel, simple hydrogen storage, and solar panels designed specifically to run electrolyzers for hydrogen production. Complete, clear, illustrated instructions to build all the major components make it easy for the non-engineer to understand and work with this important new technology.

Featured are the author's innovative and practical designs for efficient solar powered hydrogen production including:

ESPMs (Electrolyzer Specific Photovoltaic Modules) – 40 watt solar panels designed specifically to run electrolyzers efficiently;

a 40-80 watt electrolyzer for intermittent power from renewable energy sources such as solar and wind;

and, a 6-12 watt planar hydrogen fuel cell stack to generate electricity.

Any of these components can be ganged or racked, or scaled up in size for higher output.

You'll also learn how to set up an entire gas processing system, and where to find parts and materials – everything you need for an experimental stationary unit that will give you a solid base for building and operating systems for larger power needs. There are even schematics for adapting conventional solar panels (BSPMs – Battery Specific Photovoltaic Modules) for efficient hydrogen production, and setting up hybrid (battery and fuel cell) PV systems.

Build a Solar Hydrogen Fuel Cell System has over 135 photos and illustrations, as well as 5 templates for a planar fuel cell stack.

NOTE If you have never constructed a fuel cell before, we recommend you first study **Build Your Own Fuel Cells** by the same author, before you attempt to build the planar fuel cell stack.

From reader reviews:

Carol Johnson:

Have you spare time for any day? What do you do when you have more or little spare time? That's why, you can choose the suitable activity for spend your time. Any person spent all their spare time to take a walk, shopping, or went to typically the Mall. How about open or read a book called Build A Solar Hydrogen Fuel Cell System? Maybe it is for being best activity for you. You recognize beside you can spend your time with the favorite's book, you can better than before. Do you agree with it has the opinion or you have different opinion?

Winford Patterson:

The book Build A Solar Hydrogen Fuel Cell System can give more knowledge and also the precise product information about everything you want. So why must we leave the good thing like a book Build A Solar Hydrogen Fuel Cell System? A number of you have a different opinion about reserve. But one aim that will book can give many info for us. It is absolutely correct. Right now, try to closer together with your book. Knowledge or data that you take for that, you can give for each other; you could share all of these. Book Build A Solar Hydrogen Fuel Cell System has simple shape nevertheless, you know: it has great and large function for you. You can appear the enormous world by open up and read a e-book. So it is very wonderful.

Angelica Adams:

Reading a book can be one of a lot of task that everyone in the world likes. Do you like reading book thus. There are a lot of reasons why people like it. First reading a reserve will give you a lot of new data. When you read a publication you will get new information since book is one of many ways to share the information as well as their idea. Second, studying a book will make you actually more imaginative. When you looking at a book especially fictional works book the author will bring one to imagine the story how the characters do it anything. Third, you are able to share your knowledge to other individuals. When you read this Build A Solar Hydrogen Fuel Cell System, it is possible to tells your family, friends as well as soon about yours publication. Your knowledge can inspire the others, make them reading a book.

Charles Bock:

You could spend your free time to read this book this reserve. This Build A Solar Hydrogen Fuel Cell System is simple to deliver you can read it in the park, in the beach, train and also soon. If you did not include much space to bring the particular printed book, you can buy typically the e-book. It is make you simpler to read it. You can save the particular book in your smart phone. Thus there are a lot of benefits that you will get when one buys this book.
