Mathematics Education and the Legacy of Zoltan Paul Dienes (Montana Mathematics Enthusiast)

The name of Zoltan P. Dienes (1916-) stands with those of Jean Piaget and Jerome Bruner as a legendary figure whose theories of learning have left a lasting impression on the field of mathematics education. Dienes' name is synonymous with the Multi-base blocks (also known as Dienes blocks) which he invented for the teaching of place value. He also is the inventor of Algebraic materials and logic blocks, which sowed the seeds of contemporary uses of manipulative materials in mathematics instruction. Dienes' place is unique in the field of mathematics education because of his theories on how mathematical structures can be taught from the early grades onwards using multiple embodiments through manipulatives, games, stories and dance. Dienes' notion of embodied knowledge presaged other cognitive scientists who eventually came to recognize the importance of embodied knowledge and situated cognition - where knowledge and abilities are organized around experience as much as they are organized around abstractions. Dienes was an early pioneer in what was later to be called sociocultural perspectives and democratization of learning. This monograph compiled and edited by Bharath Sriraman honors the seminal contributions of Dienes to mathematics education and includes several recent unpublished articles written by Dienes himself. These articles exemplify his principles of guided discovery learning and reveal the non-trivial mathematical structures that can be made accessible to any student. The monograph also includes a rare interview with Dienes in which he reflects on his life, his work, the role of context, language and technology in mathematics teaching and learning today. The book finds an important place in any mathematics education library and is vital reading for mathematics education researchers, cognitive scientists, prospective teachers, graduate students and teachers of mathematics.

From reader reviews:

Edward Knudsen:

Book will be written, printed, or descriptive for everything. You can recognize everything you want by a publication. Book has a different type. As you may know that book is important point to bring us around the world. Adjacent to that you can your reading ability was fluently. A e-book Mathematics Education and the Legacy of Zoltan Paul Dienes (Montana Mathematics Enthusiast) will make you to possibly be smarter. You can feel a lot more confidence if you can know about everything. But some of you think this open or reading any book make you bored. It's not make you fun. Why they could be thought like that? Have you seeking best book or suitable book with you?

John Malcolm:

Playing with family in a park, coming to see the marine world or hanging out with buddies is thing that usually you will have done when you have spare time, in that case why you don't try thing that really opposite from that. One particular activity that make you not experience tired but still relaxing, trilling like on roller coaster you have been ride on and with addition associated with. Even you love Mathematics Education and the Legacy of Zoltan Paul Dienes (Montana Mathematics Enthusiast), you can enjoy both. It is fine combination right, you still want to miss it? What kind of hangout type is it? Oh seriously its mind hangout men. What? Still don't obtain it, oh come on its named reading friends.

Timothy Payne:

In this period of time globalization it is important to someone to obtain information. The information will make you to definitely understand the condition of the world. The healthiness of the world makes the information simpler to share. You can find a lot of personal references to get information example: internet, paper, book, and soon. You will see that now, a lot of publisher this print many kinds of book. Typically the book that recommended for your requirements is Mathematics Education and the Legacy of Zoltan Paul Dienes (Montana Mathematics Enthusiast) this reserve consist a lot of the information of the condition of this world now. This particular book was represented how can the world has grown up. The terminology styles that writer use to explain it is easy to understand. The actual writer made some analysis when he makes this book. This is why this book suitable all of you.

Herman Hernandez:

That book can make you to feel relax. This specific book Mathematics Education and the Legacy of Zoltan Paul Dienes (Montana Mathematics Enthusiast) was colorful and of course has pictures on the website. As we know that book Mathematics Education and the Legacy of Zoltan Paul Dienes (Montana Mathematics Enthusiast) has many kinds or genre. Start from kids until adolescents. For example Naruto or Investigator Conan you can read and believe that you are the character on there. Therefore , not at all of book tend to be make you bored, any it can make you feel happy, fun and rest. Try to choose the best book for you

personally and try to like reading that.
