**The Earth and Its Peoples: A Global History, Brief Edition (v. 1&2)** Richard Bulliet, Pamela Crossley, Daniel Headrick, Steven Hirsch, Lyman Johnson

Although this brief edition is two-thirds the length of its full-length counterpart, it retains coverage of all major themes and provides a truly global perspective on world history, without over-emphasizing Europe or the U.S. The Earth and Its Peoples focuses on the interaction of human beings and the environment, using this central theme to compare different times, places, and societies. Special emphasis is given to technology and how technological development underlies all human activity. Ideal for one-semester survey courses or courses for which instructors want to supplement their textbook with many primary sources, this text has been carefully abbreviated to maintain the essential narrative of world history. Key pedagogical elements have also been retained.
