Proceedings of the American Institute of Electrical Engineers Volume 25 American Institute of Engineers

This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1906 Excerpt: ...three is so that you may go back and see where the mistake was when some one makes out a ticket wrong. That sounds quite simple, and yet nobody has turned out such a device. I thought I would invent one to order, three or four years ago. I consulted a mechanical expert and asked him to get it up for me. After a few days he called on me and laid on my desk what he called the literature of the subject--a bundle containing about 500 patents of similar devices, and told me he would be glad to get up the machine at \$50 per day, but could not tell how many months it would take. Edwin J. Prindle: Mr. Steinmetz's report of his remarks at the convention, concerning my paper on the "Art of Inventing" has been modified so that my oral reply to it does not appear to have complete connection with the matter, but as those who were present at the convention and who remember the matter will retain the impression of his remarks as they were actually delivered, I desire to make the following more complete reply to Mr. Steinmetz's remarks. Mr. Steinmetz' position was that inventing is a mere incident of engineering, and that inventing, considered by itself, is one of the forms of activity which is least worthy of respect. The engineer is doing engineering per se when he is designing structures and apparatuses for new situations and conditions without changing their principles. When, however, he is introducing new principles of operation, he is inventing, as distinguished from practicing engineering proper. Mr. Steinmetz seems to think that it is a higher grade of work to select from among known apparatuses, that apparatus best suited for a given condition, and to determine its size and proportion by the use of mathematics and engineering rules already in existence, ...

From reader reviews:

Henry Barba:

In this 21st hundred years, people become competitive in every single way. By being competitive right now, people have do something to make these individuals survives, being in the middle of the actual crowded place and notice by surrounding. One thing that occasionally many people have underestimated the item for a while is reading. Yes, by reading a e-book your ability to survive enhance then having chance to endure than other is high. To suit your needs who want to start reading the book, we give you this Proceedings of the American Institute of Electrical Engineers Volume 25 book as basic and daily reading publication. Why, because this book is more than just a book.

Ashley McKay:

This Proceedings of the American Institute of Electrical Engineers Volume 25 usually are reliable for you who want to certainly be a successful person, why. The key reason why of this Proceedings of the American Institute of Electrical Engineers Volume 25 can be among the great books you must have is definitely giving you more than just simple studying food but feed you with information that might be will shock your previous knowledge. This book is actually handy, you can bring it everywhere and whenever your conditions both in e-book and printed people. Beside that this Proceedings of the American Institute of Electrical Engineers Volume 25 forcing you to have an enormous of experience including rich vocabulary, giving you tryout of critical thinking that we understand it useful in your day activity. So , let's have it and revel in reading.

Raquel Black:

This book untitled Proceedings of the American Institute of Electrical Engineers Volume 25 to be one of several books which best seller in this year, that is because when you read this publication you can get a lot of benefit in it. You will easily to buy this particular book in the book shop or you can order it by means of online. The publisher of this book sells the e-book too. It makes you easier to read this book, since you can read this book in your Touch screen phone. So there is no reason for you to past this guide from your list.

Timothy Wrobel:

Reading a guide tends to be new life style with this era globalization. With looking at you can get a lot of information that will give you benefit in your life. Along with book everyone in this world can easily share their idea. Ebooks can also inspire a lot of people. Many author can inspire their very own reader with their story as well as their experience. Not only situation that share in the guides. But also they write about the information about something that you need instance. How to get the good score toefl, or how to teach your kids, there are many kinds of book that exist now. The authors these days always try to improve their skill in writing, they also doing some study before they write to their book. One of them is this Proceedings of the American Institute of Electrical Engineers Volume 25.
