The Social Construction of Gender (Gender & Society Reader)

Essentialist notions of gender difference are being challenged increasingly by research on the social construction of gender. Lorber and Farrell present a key collection of current research which illustrates how the constructivist approach has been applied to a variety of issues, including those centred on the family, the workplace, social class, ethnic identity and politics.

Much of the recent work in this area has appeared in the journal *Gender and Society* which is the genesis of most of the papers in this volume.
