Reinventing Discovery: The New Era of Networked Science Michael Nielsen

In *Reinventing Discovery*, Michael Nielsen argues that we are living at the dawn of the most dramatic change in science in more than 300 years. This change is being driven by powerful new cognitive tools, enabled by the internet, which are greatly accelerating scientific discovery. There are many books about how the internet is changing business or the workplace or government. But this is the first book about something much more fundamental: how the internet is transforming the nature of our collective intelligence and how we understand the world.

Reinventing Discovery tells the exciting story of an unprecedented new era of networked science. We learn, for example, how mathematicians in the Polymath Project are spontaneously coming together to collaborate online, tackling and rapidly demolishing previously unsolved problems. We learn how 250,000 amateur astronomers are working together in a project called Galaxy Zoo to understand the large-scale structure of the Universe, and how they are making astonishing discoveries, including an entirely new kind of galaxy. These efforts are just a small part of the larger story told in this book--the story of how scientists are using the internet to dramatically expand our problem-solving ability and increase our combined brainpower.

This is a book for anyone who wants to understand how the online world is revolutionizing scientific discovery today--and why the revolution is just beginning.

From reader reviews:

Paul Hinojosa:

As people who live in often the modest era should be revise about what going on or data even knowledge to make these keep up with the era which is always change and move ahead. Some of you maybe will probably update themselves by studying books. It is a good choice to suit your needs but the problems coming to an individual is you don't know which one you should start with. This Reinventing Discovery: The New Era of Networked Science is our recommendation to make you keep up with the world. Why, as this book serves what you want and wish in this era.

Julie Flanagan:

Often the book Reinventing Discovery: The New Era of Networked Science will bring someone to the new experience of reading any book. The author style to explain the idea is very unique. Should you try to find new book to read, this book very ideal to you. The book Reinventing Discovery: The New Era of Networked Science is much recommended to you to see. You can also get the e-book through the official web site, so you can quicker to read the book.

Jennifer Day:

Playing with family within a park, coming to see the ocean world or hanging out with pals is thing that usually you may have done when you have spare time, after that why you don't try point that really opposite from that. One particular activity that make you not experiencing tired but still relaxing, trilling like on roller coaster you are ride on and with addition info. Even you love Reinventing Discovery: The New Era of Networked Science, you are able to enjoy both. It is good combination right, you still want to miss it? What kind of hangout type is it? Oh can happen its mind hangout people. What? Still don't buy it, oh come on its identified as reading friends.

Michael Carr:

What is your hobby? Have you heard which question when you got students? We believe that that problem was given by teacher with their students. Many kinds of hobby, Every person has different hobby. And also you know that little person such as reading or as reading become their hobby. You need to know that reading is very important in addition to book as to be the point. Book is important thing to include you knowledge, except your teacher or lecturer. You will find good news or update with regards to something by book. Different categories of books that can you decide to try be your object. One of them is Reinventing Discovery: The New Era of Networked Science.
