## **Toward an Architecture (Getty Research Institute)** A01 Le Corbusier

Published in 1923, *Toward an Architecture* had an immediate impact on architects throughout Europe and remains a foundational text for students and professionals. Le Corbusier urges readers to cease thinking of architecture as a matter of historical styles and instead open their eyes to the modern world. Simultaneously a historian, critic, and prophet, he provocatively juxtaposes views of classical Greece and Renaissance Rome with images of airplanes, cars, and ocean liners. Le Corbusier's slogans—such as “the house is a machine for living in”—and philosophy changed how his contemporaries saw the relationship between architecture, technology, and history. This edition includes a new translation of the original text, a scholarly introduction, and background notes that illuminate the text and illustrations.
